ABOUT ME

Motivated Software Engineering undergraduate at the Sri Lanka Institute of Information Technology (SLIIT), with hands-on experience developing full-stack web and mobile applications, AI-powered systems, and machine learning solutions through academic projects. Skilled in Java, C#, .NET, React, React Native, Flutter, Python, PostgreSQL, and MongoDB, with experience in agentic AI integration using LangGraph and version control with Git and GitHub. Familiar with GitHub Actions workflows and CI/CD concepts. Eager to apply technical knowledge, problem-solving skills, and a continuous learning mindset to real-world software development projects as a Software Engineering Intern.

EDUCATION

BSc (Hons) in Information Technology – Specializing in Software Engineering
Sri Lanka Institute of Information Technology (SLIIT) | 2024–2028

TECHNICAL SKILLS

Programming: Java, Python, C, C#, JavaScript, TypeScript
Frameworks & Platforms: .NET, ASP.NET Core Web API, React, React Native, Flutter, Vite
Databases: PostgreSQL, MongoDB, MySQL, SQL
AI & Data Science: Agentic AI, LangGraph, Machine Learning, Regression, Pandas, Scikit-learn
DevOps & Tools: Git, GitHub, GitHub Actions workflows (CI/CD), VS Code, PyCharm, Google Colab
Core Concepts: Object-Oriented Programming (OOP), Full-Stack Development, Software Architecture, Database Design

PROJECTS

E-Waste Management System

Technologies: .NET 8, ASP.NET Core Web API, Entity Framework Core, React, Vite, Flutter, PostgreSQL, Python, LangGraph, GitHub Actions

- Developed a full-stack e-waste management platform with a centralized ASP.NET Core Web API and PostgreSQL database, supporting React web and Flutter mobile applications.
- Designed backend data access using Entity Framework Core to support communication between application clients and the database.
- Integrated a Python-based agentic AI service using LangGraph to support workflow tasks such as analysis, matching, validation, and planning.
- Organized the codebase into modular backend, web frontend, mobile application, AI service, documentation, and CI/CD workflow components.
- Used Git and GitHub branching conventions, including main, develop, and feature branches, to support collaborative development and code management.
- Configured GitHub Actions workflows to automate CI/CD tasks.

Online Food Delivery Mobile App

Technologies: React Native, TypeScript (TSX), MongoDB

- Developed a cross-platform mobile application for online food ordering and delivery using React Native and TypeScript.
- Built reusable, type-safe UI components to improve code consistency, readability, and maintainability.
- Integrated MongoDB to store and manage application data.
- Structured application components to support maintainable development and a consistent user experience across supported mobile platforms.

AI-Driven Residential Property Valuation ML Model

Technologies: Python, Scikit-learn, Pandas, Google Colab, Machine Learning (Regression)

- Developed a machine-learning workflow to estimate residential property values using historical real-estate data.
- Performed data preprocessing, including data cleaning, transformation, and normalization, to prepare datasets for model training.
- Trained and compared regression models to identify suitable approaches for property price prediction.
- Evaluated model performance and analyzed feature importance to identify factors influencing property valuations.

Smart Construction Tracking System

Technologies: HTML, CSS, JavaScript, Java

- Developed a web-based construction tracking system to monitor project milestones and resource allocation.
- Created interactive dashboards to visualize construction progress and provide a clear overview of project activities.
- Implemented digital logging to improve the visibility and traceability of project updates and reporting.
- Used frontend web technologies and Java to develop application functionality.

CERTIFICATIONS

Frontend Developer (React): HackerRank Role Certification | Earned 03 Jun 2026
Server-side Web Programming: Centre for Open & Distance Learning (CODL), University of Moratuwa

SOFT SKILLS

Problem Solving, Analytical Thinking, Team Collaboration, Time Management, Communication, Adaptability, Critical Thinking
